## STONEBRIDGE COMPANIES HOMEWOOD SUITES

**LOCATION:** Denver, Colorado    **JOB SIZE:** 29 Suites —  
**SERVICES:** Mold Remediation    Kitchens and Rooms

### PROJECT:

Microorganism growth was identified in hotel rooms during standard construction restoration, requiring immediate quiet fix or Hilton® rental losses and reputation could have been devastating.

### CHALLENGES:

Stonebridge Companies had a strict timeline to ensure suites were available for rent during their busy season while not impacting customers whose rooms were unaffected. No toxic properties could reach the breathing spaces of staff or customers during remediation.

### RESULTS:

The client’s expectations were surpassed, EPA standards met, while keeping the original renovation project on schedule. Hotel rooms were available for occupancy as originally anticipated.
